

EPDM Rubber expansion joint With changing installments lengths depending on the diameter

Technical specifications:

It is suitable for compansion, vibration and shock absorption in the rigid tube system.

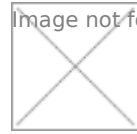

Image not found or type unknown

Operating pressure: 16 bar

Heat resistance: -10°C / +100°C

Medium: water

Flanges: PN 16

Flanges material: galvanized steel

Material: EPDM

Certain diameters are available from stock. Meantime, we hold the right of selling the stock in products.
