

Ball valve with protection Rubber or metal framed protection

Technical specifications:

The ball valve is often used at the end of the hose, which other end has some nozzle or foam lance.

These can be protected with rubber, which gives protection to the ball valve, as well as the floor, in case of a strong fall, also the dangle is ergonomic. This rubber available for the quick connector too.

Another option to metal protection frame for the butterfly handle.

The rubber made of blue EPDM, and the ball valve is AISI 304.

Operating pressure: 60 bar

Heat resistance: +95 C

Certain diameters are available from stock. Meantime, we hold the right of selling the stock in products.

Design	Connection size	Article number
Ball valve with metal frame and rubber quick coupling	1/2" and female quick coupling	444001
Rubber ball valve with rubber quick coupling	1/2" and female quick coupling	350468
Rubber ball valve	1/2" female and female coupling	350156
