

## DMS-1 Manual hose reel Made of stainless steel

### Technical specifications:

The industrial design makes it suitable for the high pressure cleaning hose manual retracting, and for the food industry. The material is stainless steel AISI 304 / AISI 303.

The article number, the coupling sizes and the hose's capacity are in the chart below.

Operating pressure: 200 or 600 bar as well as for a larger size 20 or 80 bar

Operating temperature: 90 C

Mounting: one or two sided fastening

The article number does not include the hose.

The hose on the picture is only illustration; it has to be ordered separately.

| Hose inside ø (mm) | Hose length (m) | Wall mounting | Coupling | Coupling (from the hose side) | Weight (kg) | Article number |
|--------------------|-----------------|---------------|----------|-------------------------------|-------------|----------------|
| 10/12              | 50/35           | one sided     | 1/2      | 1/2                           | 12          | DMS 310        |
| 10/12              | 50/35           | two sided     | 1/2      | 1/2                           | 12          | DMS 610        |
| 19/25              | 20/10           | one sided     | 1        | 1                             | 12          | DMS 320        |
| 19/25              | 20/10           | two sided     | 1        | 1                             | 14          | DMS 620        |
| 10/12              | 70/50           | one sided     | 1/2      | 1/2                           | 12,5        | DMS 510        |
| 10/12              | 70/50           | two sided     | 1/2      | 1/2                           | 12,5        | DMS 710        |
| 19/25              | 35/20           | one sided     | 1        | 1                             | 13          | DMS 520        |
| 19/25              | 35/20           | two sided     | 1        | 1                             | 15          | DMS 720        |
