

FLOW-CR Corrugated walled Teflon hose

Technical specifications:

The Teflon hose is extremely flexible and has a corrugated wall.

It is solvent and heat-resistant flexible hose which is suitable for chemical industry.

Temperature range: -70/+260 C

Design:

- virgin
- black, electrically conductive
- with or without vacuum spiral
- fabric cover (stainless steel, PP, PVDF)
- fabric cover + smooth rubber coating (EPDM or silicon)

Couplings: Added by the manufacturer, as the customer requires it.

Just for order!

| Inside ø (mm) | DN | Bending radius (mm) | Operating pressure with metal braiding (mm) | Operating pressure with plastic braiding (bar) |
