

Metal hose with flange With pre-manufactured DN125x500 3.1 mechanical certification

Technical specifications:

It's a DN 125 x 500 mm flexible metal hose, with acid resistant metal coating.

Both end has a DN 125 PN 16 loose flange junction.

The hose is suitable for gas application, as an expansion joint, or connecting element.

It can be delivered with pressure test certification and MSZ EN 10204:2005 3.1 mechanical certification, from stock right away.

The loose flange material is carbon steel, the surface, which contacts the sealing surface, is acid resistant steel.

Operating pressure: 16 bar

DN125 metalhose material quality: 1.4541

Metal braiding material quality: 1.4301

Flange sealing surface material quality: 1.4541

DN125 PN 16 Loose flange material quality: surface treated carbon steel

Storage lots, splitting of the packages are possible. Meantime, we hold the right of selling the stock in products.
