

PTFE Hose couplings With or without lining in the sealing surface

Technical specifications:

It is delivered with the FLOW SM and FLOW CR couplings. The couplings can be made with a Teflon tafted sealing surface, it can prevent the meeting of the medium and the metal parts. Also it makes the cleaning easier and the transition dead spot free.

The couplings can be made by the customer needs.

Popular designs are the hoses with flange, tri-clamp ferrule, threaded or quick connector.
