

Rubber expansion joint PN16 HYPALON PN 16 with flange

Technical specifications:

Can be delivered with a design which makes it suitable for vacuum, and with stainless steel and ANSI flanges.

Material HYPALON (chemical resistant)

Interior hypalon, exterior neoprene

Colour code: green/yellow

Flange size: DIN PN 16

The given operating pressure is valid on 80C. In case of higher temperature°, the pressure resistance decreases, request a quotation.

Heat resistance: -10°C / +100°C

On stock at the manufacturer, short delivery time with regular shipments

DN	Installment length (mm)	Compansion (mm)	Expansion (mm)	Lateral (mm)	Amgular	Operating pressure (bar)
