

Rubber expansion joint PN16 HYPALON PN 16 with flange

Technical specifications:

Can be delivered with a design which makes it suitable for vacuum, and with stainless steel and ANSI flanges.

Material HYPALON (chemical resistant)

Interior hypalon, exterior neoprene

Colour code: green/yellow

Flange size: DIN PN 16

The given operating pressure is valid on 80C. In case of higher temperature°, the pressure resistance decreases, request a quotation.

Temperatur: -25°C / +90°C

Length: 130 mm

inside: Hypalon (CSM)

Outside: Neopren (CR)

Flanges: DIN PN 16

Working pressure: 16 bar (90 °C-on 10 bar)

Material of flanges: Horganyzott acél

Size range: DN 32-DN300

On stock at the manufacturer, short delivery time with regular shipments
