

## Reducer with TW/PTFE lining Hydrochloric acid resistant

### Technical specifications:

It's a DIN TW standard coupling with Teflon coating, which is persistent against the kind of chemicals and acids, which can attack stainless steel (for example Hydrochloric acid, ferric chloride).

We are able to give PTFE, ETCFE, FEP or PFA coating for almost any unique hose tail, adapter or coupling.

The PTFE coating can be virgin (white, translucent) or electrically conductive (black).

The two male threads can be screwed on to male and female couplings with size of DN50 and DN80.

Size	Type	Title	Lining	Article number
DN 50 / DN 80	KK 50-80 PTFE	reducer	PTFE natural	601014
